DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, drawn to a liquid crystal with regions of different effective voltages, classified in class 349, subclass 33.
- II. Claims 16-24 drawn to a liquid crystal with regions of different effective voltages based upon a polymer mixed with the liquid crystal, classified in class 349, subclass 86.
- III. Claim 25-26, drawn to a liquid crystal with an alignment layer with a polymerization initiator that varies by region, classified in class 349, subclass 129.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each invention has separate utility such as they can be used with alignment layers without regional division, without polymer mixed in an with even effective voltages.. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
